Shiqing Jing

Description:

We found this project and get the idea from BitTigger, so we are going to build a web application similar to Apple appstore with the goal of providing users with an easy way to navigate page where they can browse available apps.

Stacks:

We will use the Spring-MVC framework, Mongo dB for data storage, Tomcat 8.0 for web server, and JavaScript and jQuery for front end.

Time Schedule:

1. 7.4-7.10   Project Selection and Plan Discussion
2. 7.11-7.17   Skill Study: Spring-MVC, Mongo dB, JavaScript.
3. 7.18-7.29   System Design, Database Design, Project Implementation.
4. 7.30-8.5   Manual writing and Project Completion.
